6.	Interpretations of the student's own therapeutic procedures in rehabilitation	x					
7.	Use of the scientific literature	x					
8.	Formal style of the thesis		x				

(Mark the assessment with X)

Specific comments on the thesis and supplementary questions:
Rehabilitation plan and Proces to Treat a Patients with Chronic Lower BackPain is called the bachelor s thesis by Francesca Gina Evans. The thesis had 103 pages and 64 citations. There is an incorrect division of individual parts of the words. The thesis is very extensive, the introduction on 40 pages could have been more concise.
After minor repairs, the work will be excelent.

Final Opinion:
I **recommend** the presented thesis for defense *(delete as applicable)*
Suggested grade (*circle the grade or leave only the suggested grade in the chart*)
